Press Release

Marantz® releases a new mid range Network Audio Player, the NA6005 features high resolution audio playback

Kleinburg, Ontario January 15th, 2015 – Marantz, a world leader in advanced audio technologies, today announced their new NA6005 Network Audio Player to complement the already introduced PM6005 and CD6005 amplifier/CD player duo. The NA6005 opens up a whole new world of nearly unlimited digital music sources to existing stereo components. Most remarkably, the NA6005 features Wi-Fi and Bluetooth® technology on board, as well as unique Marantz audio technologies to offer ultimate connectivity options and best in sound performance at the same time.

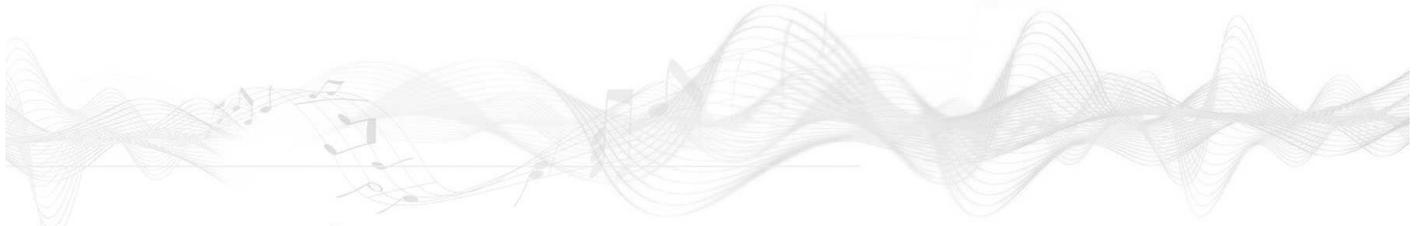

Similar to its predecessors the NA-11S1 and NA8005, the new NA6005 inherits a lot of reference class technologies for demanding yet price-cautious music lovers. To guarantee the world-renowned Marantz quality the cabinet has been made very rigid, the power supply extra strong, and sound parts have been strictly selected. Owners can enjoy all their music in pure, unadulterated clarity, thanks to the NA6005's high-class Digital-Analog-Converter and unique output stage. The audio circuitry employs Marantz's exclusive HDAM and HDAM-SA2 in a hybrid configuration to achieve low noise and high speed for detailed and powerful playback at the same time.

Through built-in Wi-Fi or Ethernet port, the NA6005 connects to a home network accessing thousands of Internet radio stations and popular music streaming services like Spotify Connect®. It is likewise equipped with Apple's Airplay® so users can stream their iTunes® music, whether from a Mac or PC, as well as directly from their iPhone®, iPad® or iPod touch®. Thanks to its DLNA® 1.5 compatibility, music lovers can also access their local file libraries on a Network Attached Storage device (NAS) or a Computer Media Server, and playback numerous audio file types, including WAV, WMA, MP3 and AAC. Moreover, the NA6005 can playback high resolution audio files including DSD2.8MHz/5.6MHz, FLAC 192/24, WAV 192/24, AIFF and ALAC for

ultimate audio fidelity. Gapless is supported for the uninterrupted enjoyment of a live concert or classical recording.

The front USB input expands the musical horizons even more, allowing users to enjoy iPhone and iPod audio via a digital connection. Users can hear the music with new detail and richness through their home audio system, with sonic refinements made possible thanks to the NA6005's advanced circuitry. Built-in Bluetooth capability even allows owners to connect a wide variety of supporting handheld devices with the touch of a finger. In addition, there is an optical digital input to connect a TV or cable box. But amazingly, all this versatility is extremely easy to operate, via the large display or the new dedicated Marantz Hi-Fi Remote App. It all makes the NA6005 an open door to a myriad of music stations, podcasts, documentary channels and more – all with the best possible audio quality.

This Network Audio Player perfectly adds to the recently introduced Marantz 6005 series featuring the PM6005 amplifier and CD6005 CD Player. It is expected to be available at authorized Marantz dealers and online in black beginning in February for \$749.00.

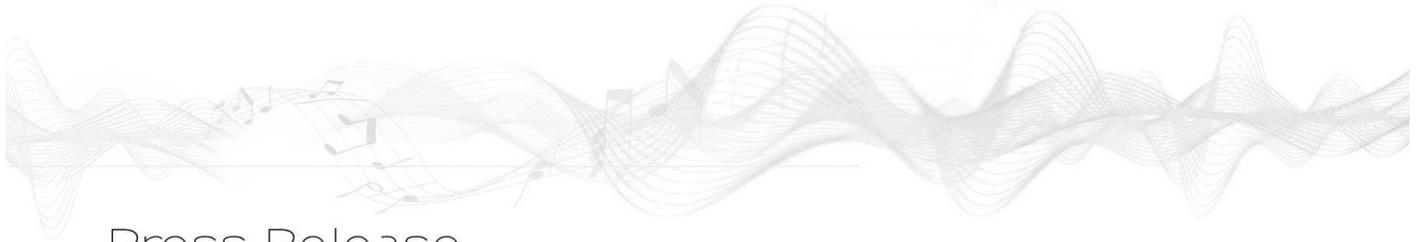

NA6005 Network Audio Player with Wi-Fi and Bluetooth – Main Features

- High-quality sound with Marantz unique engineering
- Analog audio circuits featuring Marantz HDAM-SA2 for high quality audio

About Marantz

Marantz is a part of D+M Group. The company can trace its roots back to the dawn of the first mono LP, when Saul Bernard Marantz, a native of New York, was unhappy with the equipment available to play his cherished record collection on. So he had to build his own! Saul officially founded the Marantz Company in 1953. Then, as now, the company's cornerstones were quality and innovation. For over half a century Marantz has been developing unique technologies and bringing landmark hi-fi and home entertainment products to market through its tireless and extensive R&D programs. Such commitment to audio and video excellence ensures each Marantz design delivers class-leading performance. Additional information is available at www.ca.marantz.com.
