Marantz renews its highly-acclaimed Network AV receiver series with new SR5009 featuring built-in Wi-Fi and Bluetooth

Kleinburg, Ontario (June 18, 2014) —Marantz®, a world leader in advanced home entertainment solutions, announces a new full-grown Network [AV Receiver](#) for home entertainment enthusiasts with built in Wi-Fi and Bluetooth. Born from its highly acclaimed predecessors, the new SR5009 adds even more clever features to the renowned audio performance, which has again been fine-tuned to deliver the true Marantz experience. The [Marantz SR5009](#) (\$999) is expected to be available in August at selected Marantz dealers and online.

The SR5009 comes with the most advanced network capabilities opening up almost unlimited sources of music content. This receiver offers full audio streaming capabilities thanks to the built-in digital media player, which can decode music files stored on a PC or external storage unit streamed via the network. Almost any file is possible including MP3, WMA, FLAC HD, ALAC, WAV192/24 & AAC. Gapless, DSD, and AIFF are also supported for the full enjoyment of live concerts or classical recordings. Next to Apple AirPlay technology, the SR5009 is ready to access thousands of Internet radio stations, as well as on-demand music streaming services such as Spotify Connect. Today, there are simply no limits.

Next to the network streaming possibilities, Marantz offers its renowned sound quality made possible through a discrete amplifier section. The SR5009 owns a 7-channel amplifier with an amazing 180W equal power per channel. The latest current feedback topology and Marantz own new HDAMs are also central, as they guarantee both power and detail, easily handling the most demanding of scenes in action films, as well as offering excellent-quality music playback. Moreover, users can easily configure the

SR5009 for multi-room listening by hooking up a second pair of speakers to two of the amp channels. This lets users enjoy 5.1 channel surround sound in the main room, while others enjoy stereo sound from a different source in another room.

The SR5009 comes with no less than eight HDMI inputs of which one is on the front and two outputs – making it immediately ready for 3D and even 4k 50/60Hz UHD resolution. Even more, the receiver features high-quality video processing technology to upscale standard of high definition video to Full HD 1080p and even 4k 24/25/30 Hz for ultimate future-readiness.

As with many of this year's models, the SR5009 includes the latest Marantz smart ECO mode that reduces power consumption significantly when used for background listening or running on lower levels without any negative impact to the audio quality. If the higher power is required while watching a movie or listening louder to favorite music, the SR5009 automatically switches to "full power output". The smart ECO mode has three settings: Auto, On and Off.

In all, the SR5009 comes with a whole range of convenience features such as: Setup Assistant, auto calibration with advanced Audyssey MultiEQ XT room correction; four Smart Select buttons, Multi-Room with multi-source flexibility; and "video-off" mode to ensure that you enjoy your music and movies in true dynamic Marantz style. It also has the specially developed Marantz Remote App for smartphone and tablet. All of which makes the SR5009 a true combination of style, power and ease.

SR5009 Network AV Receiver – Main Features

- Wi-Fi and Bluetooth built-in
- Current Feedback topology and new Marantz HDAM
- FM / AM tuner
- Dolby TrueHD and DTS HD Master Audio

- 7.2ch pre-out, RS232
- Marantz Remote App for iOS and Android devices
- ECO mode

About Marantz:

Marantz is a part of D+M Group. The company can trace its roots back to the dawn of the first mono LP, when Saul Bernard Marantz, a native of New York, was unhappy with

the equipment available to play his cherished record collection on. So he had to build his own! Saul officially founded the Marantz Company in 1953. Then, as now, the company's cornerstones were quality and innovation. For over half a century Marantz has been developing unique technologies and bringing landmark hi-fi and home entertainment products to market through its tireless and extensive R&D programs. Such commitment to audio and video excellence ensures each Marantz design delivers class-leading performance. Additional information is available at www.ca.marantz.com.
